(a) work distributions
P(W)
work W [ε]
τ/τ1 = 1
τ/τ1 = 3
τ/τ1 = 30
exact ΔF
(b) convergence of the Jarzynski estimate
ΔF̂j [ε]
pulls used per estimate n
(c) e^−βW, τ/τ1 = 1
(d) e^−βW, τ/τ1 = 3
(e) e^−βW, τ/τ1 = 30
fraction per bin
log10 e^−β(W − ΔF)
pulls
share of sample mean
exact share (reverse pulls)
exact mean = 1
sample mean
